

BOLINGBROOK HIGH SCHOOL | Chicago, Illinois

This 3000 student high school was one of the largest comprehensive high schools build in recent years. Franklin Hill and Associates provided a variety of educational planning services to include:

- Advanced lecture/laboratory science laboratories
- Integrated technology educational programs with science/math
- Alternative vocational program spaces
- Special needs classrooms
- Value Engineering to maximize program size and budget

Hill provided plan review throughout the design process to further confirm the educational implications of design solutions.

The Bolingbrook High School has won numerous design and energy conversation awards as well as a Silver Certified GREEN school.
